

## **Electronics For Imaging, Inc. Conflict Minerals Policy**

The U.S. Securities and Exchange Commission adopted final rules to implement reporting and disclosure requirements related to Conflict Minerals (as defined below), as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The rules require publicly traded companies such as Electronics For Imaging, Inc. to disclose whether the products they manufacture or contract to manufacture contain “Conflict Minerals” that are “necessary to the functionality or production” of those products and whether the Conflict Minerals in their products are sourced from the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia, or Angola (“Covered Countries”). Conflict Minerals are defined as cassiterite, columbite-tantalite (coltan), gold, wolframite, and their derivatives, which are limited to tin, tantalum, and tungsten (“3TG”)

### **POLICY STATEMENT**

Electronics For Imaging, Inc. and its subsidiaries will not knowingly purchase raw materials, subassemblies, or supplies that are known to contain 3TG and directly or indirectly finance or benefit armed groups in the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia, or Angola. We will exercise due diligence with relevant suppliers consistent with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and encourage our suppliers to do likewise with their suppliers.

We expect that our direct and indirect suppliers will undertake reasonable due diligence in connection with the materials supplied to us to and will provide reasonable assurance that products sold to us are in compliance with our policy. Proof of such due diligence may include providing documentation showing that raw materials used to produce 3TG in the components and products supplied to us originate from outside of the Covered Countries or are from recycled or scrap sources. In instances in which 3TG used to produce components or products supplied to us originate from within the covered countries, the mines or smelters used to produce such 3TG should be certified as “conflict free” by an independent third party.
